PROFESSIONAL SUMMARY

DevOps Engineer with hands-on AWS, Kubernetes, Terraform, Docker, Ansible, Jenkins and GitHub Actions project experience, backed by 10 years in Linux and Windows system administration and production IT support. Built CI/CD pipelines, Infrastructure as Code on AWS, GitOps with Argo CD, and Prometheus and Grafana monitoring. Automated manual tasks with shell scripting, cutting weekly manual effort by 15%, and kept systems at 99.9% availability for 500+ users. Seeking a DevOps Engineer, Cloud Engineer or Site Reliability role.

TECHNICAL SKILLS

- **Cloud (AWS):** EC2, VPC, S3, IAM, EKS, ECS Fargate, ECR, Application Load Balancer, CloudWatch, Systems Manager (SSM)
- **Containers and Orchestration:** Kubernetes, Docker, Helm, Amazon EKS
- **Infrastructure as Code:** Terraform, Ansible
- **CI/CD:** Jenkins, GitHub Actions, Maven, Git, GitHub
- **GitOps:** Argo CD
- **Monitoring and Observability:** Prometheus, Grafana, Alertmanager, CloudWatch
- **Operating Systems:** Linux (Ubuntu, CentOS), Windows
- **Scripting:** Shell Scripting (Bash)
- **Practices:** Infrastructure as Code, CI/CD automation, GitOps, Root Cause Analysis, Incident Management, Patch Management, Least-Privilege Security

DEVOPS PROJECTS

Static Website Hosting on AWS S3 with Terraform (Jun 2026)

- Provisioned an S3 static website with Terraform, including unique bucket naming (Random Provider), public-read bucket policy and automated content upload
- Ran the full Terraform lifecycle (init, fmt, validate, plan, apply) and verified the deployment with the AWS CLI

Ansible Automated Node.js Deployment to AWS EC2 (Jul 2026)

- Built an AWS VPC with Controller and Worker EC2 instances (Ubuntu 24.04 LTS) and wrote an Ansible playbook to install Node.js and Git, clone the GitHub repository and launch the application
- Restricted SSH access to the Worker instance from the Controller using security groups; validated with Ansible ping, SSH checks and log analysis
- Protected AWS credentials and private keys from commits with .gitignore rules

Kubernetes GitOps Platform on AWS EKS (Sep 2026)

- Provisioned an AWS EKS cluster, VPC and security groups with Terraform using least-privilege principles, and deployed three microservices (Product, Cart, Order)
- Built a GitHub Actions CI/CD pipeline that builds and pushes versioned Docker images to Amazon ECR
- Implemented GitOps with Argo CD to reconcile Kubernetes manifests from a dedicated Git repository
- Integrated Prometheus, Grafana and Alertmanager for real-time monitoring and alerting of application and cluster health

- Secured cluster access with a bastion host and AWS Systems Manager (SSM) Session Manager; managed EC2 configuration with Ansible dynamic inventory and reusable roles

CI/CD Pipeline with Jenkins, Docker and Kubernetes on AWS (Oct 2026)

- Engineered an end-to-end CI/CD pipeline for a Java application using Jenkins, Maven, Docker and Kubernetes on AWS EC2
- Triggered Jenkins pipelines from GitHub commits to build, test, containerize, push images to Docker Hub and deploy to Kubernetes
- Managed Pods and Services (NodePort) for high availability of the deployed application

Terraform + GitHub Actions + AWS ECS: Zero-Touch CI/CD Deployment Platform (Oct 2026)

- Provisioned AWS ECS Fargate, Application Load Balancer and Amazon ECR with Terraform for a fully automated deployment platform
- Built a GitHub Actions pipeline that builds Docker images, pushes them to ECR and deploys to ECS on every commit
- Configured CloudWatch monitoring with automated rollback on failed deployments

PROFESSIONAL EXPERIENCE

Senior Desktop Engineer (Infrastructure and Systems Support) | Exela Technologies Pvt. Ltd., Navi Mumbai | May 2019 to Apr 2026

- Administered Windows and Linux systems, networks and applications for 500+ users, maintaining 99.9% system availability through preventive maintenance, OS patching and security remediation
- Automated routine administration with shell scripting, reducing weekly manual effort by 15%
- Cut incident recurrence by 20% through root cause analysis (RCA) and corrective and preventive actions
- Configured and maintained 200+ systems, devices, applications and user accounts in line with security and compliance requirements
- Coordinated incident resolution with stakeholders and cross-functional teams to sustain 99.9% operational continuity
- Reduced procurement lead times by 10% through hardware and software inventory management and forecasting

Senior Desktop Engineer (Systems Support) | Orient Technologies, Navi Mumbai | Aug 2017 to Apr 2019

- Provided technical support and system administration for 300+ users, resolving over 95% of issues on first contact
- Installed and configured operating systems and critical applications; escalated critical incidents to senior tiers and coordinated with vendors to minimize downtime
- Contributed to a 10% improvement in system uptime through proactive maintenance and troubleshooting
- Performed root cause analysis for hardware and software upgrade projects

Level 1 Technical Support Engineer | Enbee Software Pvt. Ltd., Navi Mumbai | Jun 2016 to Jul 2017

- Resolved 100+ technical support requests weekly through structured troubleshooting
- Worked with vendors and clients to resolve issues, achieving a 90% customer satisfaction rating

EDUCATION AND CERTIFICATIONS

- **Bachelor of Science in Information Technology,** ICL College of Science & Commerce (Jul 2012 to Jan 2014)
- **AWS Cloud Quest: Cloud Practitioner (Training Badge),** Amazon Web Services (May 2022)
- **Languages:** English (Fluent), Hindi (Native)
