PROFESSIONAL SUMMARY

DevOps-focused IT infrastructure professional with 10 years of experience in systems administration, incident troubleshooting, networking, patching, and operational support. Hands-on project experience building AWS infrastructure with Terraform, automating configuration and deployments with Ansible, packaging applications with Docker and Helm, and implementing CI/CD workflows using GitHub Actions. Also experienced with Kubernetes, GitOps using Argo CD, and monitoring with Prometheus and Grafana. Targeting DevOps Engineer, Cloud Engineer, Platform Engineer, or SRE roles.

TECHNICAL SKILLS

Cloud (AWS): EC2, VPC, S3, IAM, EKS, ECS Fargate, ECR, Application Load Balancer, CloudWatch, Systems Manager (SSM)

Containers & orchestration: Docker, Kubernetes, Amazon EKS, Helm

Infrastructure as Code & automation: Terraform, Ansible

CI/CD & source control: GitHub Actions, Jenkins, Git, GitHub, Maven

GitOps & monitoring: Argo CD, Prometheus, Grafana, Alertmanager, CloudWatch

Systems & scripting: Linux (Ubuntu, CentOS), Windows, Bash, networking, patch management, incident/RCA

SELECTED DEVOPS PROJECTS

Kubernetes GitOps Platform on AWS EKS | Sep 2026

- Provisioned an EKS cluster, VPC, and security groups with Terraform using least-privilege principles; deployed Product, Cart, and Order microservices.
- Built a GitHub Actions pipeline to build and push versioned Docker images to Amazon ECR, with Argo CD reconciling manifests from a dedicated Git repository.
- Integrated Prometheus, Grafana, and Alertmanager for application and cluster monitoring; used a bastion host/SSM and Ansible dynamic inventory for administration.

Terraform + GitHub Actions + AWS ECS: Zero-Touch CI/CD | Oct 2026

- Provisioned ECS Fargate, Application Load Balancer, and Amazon ECR using Terraform.
- Created a GitHub Actions workflow to build Docker images, push them to ECR, and deploy to ECS on commits; configured CloudWatch monitoring and rollback handling.

Ansible Automated Node.js Deployment to AWS EC2 | Jul 2026

- Configured controller and worker EC2 instances in an AWS VPC and used Ansible playbooks to install Node.js/Git, clone a GitHub repository, and launch the application.
- Restricted SSH access with security groups and validated connectivity and execution using Ansible ping, SSH checks, and log analysis.

Static Website Hosting on AWS S3 with Terraform | Jun 2026

- Provisioned an S3 static website with Terraform, including bucket policy and automated content upload; ran init, fmt, validate, plan, and apply and verified the deployment with AWS CLI.

CI/CD Pipeline with Jenkins, Docker & Kubernetes on AWS | Oct 2026

- Built a Jenkins pipeline for a Java application using Maven, Docker, and Kubernetes on AWS EC2; triggered builds from GitHub commits, pushed images to Docker Hub, and deployed Kubernetes Pods and Services.

PROFESSIONAL EXPERIENCE

Senior Desktop Engineer (Infrastructure and Systems Support) | Exela Technologies Pvt. Ltd., Navi Mumbai
May 2019 – Apr 2026

- Administered Windows/Linux systems, networks, and business applications for 500+ users, maintaining 99.9% availability through preventive maintenance, patching, and security remediation.
- Automated routine administration with shell scripting, reducing weekly manual effort by 15%; used root-cause analysis and corrective actions to reduce repeat incidents by 20%.
- Configured and maintained 200+ systems, devices, applications, and user accounts in line with security and compliance requirements.
- Coordinated incident resolution with stakeholders and cross-functional teams; supported operational continuity and inventory/procurement processes.

Healthcare Medical-Coding Application — DevOps Implementation

- Designed a demo healthcare application deployment workflow for a sample medical-coding use case; used synthetic/demo data only, with no real patient information.
- Created a GitHub Actions CI/CD workflow to check application changes, build and tag a Docker image, and publish the image to a container registry before deployment.
- Used Terraform to define repeatable AWS infrastructure, Ansible to automate host and deployment prerequisites, and Helm charts to package and release the application to Kubernetes.
- Configured Prometheus and Grafana for sample application and cluster metrics dashboards, supporting visibility into deployment health and resource usage.
- Portfolio implementation to demonstrate DevOps skills; it is not represented as a production healthcare system or work delivered for Exela Technologies.

Senior Desktop Engineer (Systems Support) | Orient Technologies, Navi Mumbai
Aug 2017 – Apr 2019

- Provided technical support and system administration for 300+ users, resolving over 95% of issues on first contact.
- Installed and configured operating systems and business applications, escalated critical incidents, coordinated with vendors, and performed root-cause analysis.

Level 1 Technical Support Engineer | Enbee Software Pvt. Ltd. — third-party employee through Wipro
Jun 2016 – Jul 2017

- Resolved 100+ technical support requests weekly through structured troubleshooting.
- Worked with vendors and clients to resolve issues, achieving a 90% customer satisfaction rating.

EDUCATION & CERTIFICATIONS

- B.Sc. in Information Technology, ICL College of Science & Commerce | Jul 2012 – Jan 2014
- AWS Cloud Quest: Cloud Practitioner (Training Badge), Amazon Web Services | May 2022

• Languages: English (Fluent), Hindi (Native)
